Public School Training for Citizenship.

Edwin G. Cooley, superintendent of the public schools in Chicago, propuses to organize the pupils into a miniature republic and teach them by actual experience their duties as citizens. The national representatives will be elected from the grammar schools, and the national senators from the high schools. State and city governments will be formed in the same way. The Australian builot system will be used in the elections and the machinery of the national government copied in every detail.

Young women not only will be allowed to vote but will be

Young women not only will be allowed to vote but will be eligible to election as senators, congressmen and aldermen. In fact the little government will be founded upon the principles of conduction and equal will more only

of co-education and equal suffrage.

If this plan is carried out, it will supply the missing element in our public school work. Education given by the state should fit the child to take his place in the state as a citizen and to perform the duties of citizenship. The growing corruption of politics shows that so far our public schools have failed in these all investors periods.

these all important particulars.

Think what it would be to have Prof. Cooley's idea carried out in all our public schools. Think of the uplift politics would receive if every graduate from the granumar school and the high school understood the sacredness of the ballot, and the necessity of using it for the public good. The boys accustomed to seeing girls voting and helding office in the mimic state would not be likely to develop into men opposed to equal rights. The girl accustomed to think of herself as a citizen would never de-velop into a remonstrant, nor world she placidly accept the le-gal conditions that class her with idiots, lunatics, criminats and gal conditions that class her with idiots, lunatics, criminals and minors. One can hardly over-estimate the good that would result from such training in citizenship and Prof. Cooley's experiment will be watched with interest, especially by those who believe that women are citizens and that they should have the same political rights that men citizens have.

Short Talks On Advertising By Charles Austin Bates.

There is probably no merchant in the United States who is not t an advertisement into a program of a church fair or of some enter-

tainment given by a secret society or a labor organization.

The people who get up these things are often perfectly houest

things are often perfectly honest in their intentions. They may honestly believe that their advertising is worth something. On the other hand, there are some who know that what they are selling has no commercial value. These things are frequently nuild sort of blackmail—sometimes they are not so mild. Sometimes a solicitor for a labor programme, or instance, insinantes more or ess plainly that unless the advertisement is taken the merchant re-"He instinutes more or less plainly that unless the advertisement is taken the merchant refusing will be blacklisted or boy-cetted, by the union, There is very cetted, by the union, There is very less plainly that the merchant will be bogoethed."

Business men all say that such things are an annoyance and that they don't pay, but only here and there is one who has the necessary nerve to refuse to have anything

to do with them.

Money paid for such things should not be charged to advertising at all. The bookkeeper should open an account for charity or so long as it isn't advertising.

A safe rule to go by is, never put an advertisement into any-

put an advertisement into any.

The people who get up these direct result. When somebody believes their street often perfect tells you that it is impossible to trace results tell them they are misken. If you put your ad into a good newspaper you can tell exactly what it brings you fix.

DRURY'S BREEDING

DENMARK DARE

=1340 N. S. H. R.= DESCRIPTION AND PEDIGREE:

Denmark Dare is a blood bay stallion, foaled May 1896. Sire, Chester Dare 10, by Black Squirrel 58; dam Mollie, by Rolla Denmark; he by Star Denmark 71, 2nd dam by Jno. Akin.

Mr. J. V. Boyd, of Shelbyville, Ky., his former owner and one of the best saddle horse breeders in the state, describes him thus: "Denmark Dare is 16 hands high, weight 1,200 lbs., beautiful head, good neck, the best back you ever saw on a horse, good legs, fine mane and tail and carries tail right. This horse goes all the gaits fast and right." He is also a high school horse

and the best broke stallion in the country. Standard and registered. This horse will be found at my stable one mile east of Bewleyville on

Louisville road and will be permitted to serve mares at \$10.00 for colts that stand up and suck. While Denmark Dare is but a youngster, he has made a reputation that would do credit to any living stallion as a sire and we kindly invite our friends and patrons to call and inspect him. You must see him to appreciate his greatness.

BEN. This famous Washington county Jack for utility mules will be found at the above mentioned place where he will be ready for service at \$10.00 for a colt that stands up and sucks. BEN is 15 hands high, black, with the best bone I ever saw on anybody's Jack and has proven himself to be a great breeder. To the get of DENMARK DARE I will give a premium of \$12.00 for the best general purpose colt. To the get of BEN I will give \$10.00 for the mule colt worth the most money.

A few mares from a distance kept on grass at \$1.50 per month. Accidents at owner's risk. Thanking you for past patronage and hoping for a continuance of same, I am, Respectfully,

WEBSTER.

PICKED UP.

There are very few valleys in this county more beautiful then that known as the stitch valley, in Meade county. It is a stretch of country, leaven or eight miles long ead three to four miles wide and is falirly well improved. This valley, they tell ns, med to be the garden spot of that section away back in the fifties, when every farmer owned from one to any number of islaves and ran their farms on e big scale. Since these these lands have changed hands, farming has run down and the lands have been neglected and are worn out. But the land is there yet and with attention and inproduce methics applied could be reclaimed and made as fertile rs in the days gone by.
